

## Loose Powder

A remarkable transformation powder brings mattness and a natural colour to the skin. Surface coated Nylonpoly® and Talcpoly® are used together with sericite based Serisoft® composite colourants. The surface treatments of the materials enhance application qualities, skin adherence and bring softness to the application. Nylonpoly® WL 10 AF particles are 10 micron sized and spherical in shape so they give a soft focus effect creating an illusion of smoother skin. Creaspheres® Silica beads enhance the mattifying function of the powder as they absorb excess sebum. They also bring softness and lubricity to the application.

Ingredients	INCI Name	Qty%	Supplier
<b>Phase A</b>			
Nylonpoly® WL 10 AF	Nylon-12 (and) Hydrogenated Polydecene	59,23	1)
Talcpoly® WL 12 DF	Talc (and) Hydrogenated Polyisobutene (and) Dimethicone	15,17	1)
Creaspheres® Silica WL 6	Silica	17,76	1)
Serisoft® WL 12 Red DF	Mica (and) CI 77491 (Iron Oxides) (and) Hydrogenated Polyisobutene (and) Dimethicone	3,38	1)
Serisoft® WL 12 Yellow DF	Mica (and) CI 77492 (Iron Oxides) (and) Hydrogenated Polyisobutene (and) Dimethicone Parfum	0,90 3,56	1)

### Procedure:

1. Mix all ingredients together until homogeneous.

### Suppliers:

- 1) CIT SARL/COSMO CHEM SARL
