

Soft Lips® with Creaspheres® Colours

Long lasting lip gloss with high colour intensity based the Creaspheres® Colours. New Creaspheres® Colours combine colour and skin feel; silky softness of silica present in bright colours. Silica in micron size 3 provides smoothness and softness on lips as well as works as colourant. Creagel® Crystal HPB together with Creagel® Crystal AF forms a long lasting, water resistant, high shine film on the lips. Its pseudoplastic behaviour keeps the lip gloss on the lips and stops bleeding around the lip area. The Creagel® Crystal allows high pigment loading as it forms a structure which holds the pigments preventing the sedimentation of the particles. Creasil® 7ID dries off creating a water resistant film which improves the long lasting quality of applications. Creasil® TDTM adds high shine benefits on the application.

Ingredients	INCI Name	Qty%	Supplier
Creagel® Crystal HPB	Hydrogenated Polyisobutene (and) Ethylene/Propylene/Styrene Copolymer (and) Butylene/Ethylene/Styrene Copolymer	28,00	1)
Creasil® TDTM	Tridecyl Trimellitate	28,00	1)
Creasil® 7ID	Isododecane (and) Dimethicone (and) Polyethacrylate	1,60	1)
Creagel® Crystal AF	Hydrogenated Polydecene (and) Ethylene/Propylene Copolymer	22,40	1)
Creasphere® Sil WL3 Colour	Silica (and) Water (and) FDA Colour *	20,00	1)

* In addition to the standard colours, Creasphere® Sil Colours are available upon customer's request.

Procedure:

1. Mix all ingredients together. No heating necessary.

Suppliers:

1) CIT SARL/COSMO CHEM SARL
