

## Anti-Wrinkle Treatment

Amazingly soft and creamy anti-wrinkle treatment, which melts to the skin. This cream provides elasticity and smooth appearance to all skin types. Natural Biometrics® Emulsifier builds gentle emulsions and has good skin compatibility as it does not disrupt skin's own barrier. Dedraflow® 5 is an emollient which is used to replace cyclomethicone. Meadowfoam Seed Oil adds skin care benefits to the formulation. Creanatural® BioCollagen mimics skin's own collagen. It creates a soft film with moisture retaining properties. Siltext® Velvet creates feeling of richness with matt application. Fiflow® brings the anti-wrinkle effect with an instant appearance of smoothness. As a functional gas carrier, Fiflow® regenerates the skin functions.

### Procedure:

- Mix water and Biometrics® Emulsifier together under slow agitation and heat up to temperature of 70 - 75°C until an even milk is created. Add the rest of the ingredients in phase A and keep heated and agitated until homogenous.
- Heat up phase B to temperature of 75 - 85°C and keep agitated until homogenous.
- Add phase B into phase A and keep agitated until homogenous.
- Mix ingredients in phase C and leave to swell for 20 minutes.
- Cool down to temperature below 35°C and add phases C, D, E and F into the mixture (A+B).
- Homogenize(6000rpm) the mixture (A+B+C+D+E+F) for 3-5 minutes.
- Add phase G into the mixture (A+B+C+D+E+F) and homogenize (1000rpm) for 1-2 minutes.
- Add phase H into the mixture (A+B+C+D+E+F+G) and homogenize (1000rpm) for 1 minute.
