

Creaspheres® PMMA WL 6

Chemical Composition:

Component	Legislation
Methyl Methacrylate CrossPolymer	CAS No. 25777-71-3 TSCA

INCI Name: Methyl Methacrylate CrossPolymer

Technical Information:

Appearance	White powder
Odour	Characteristic
Mean Particle Size	5,0 – 10,0 µm
pH (10% in Water)	5,0 – 9,0
Loss on Drying (1h-105°C)	< 2%
Solubility	Insoluble in water
Shelf Life	Minimum 3 years

Description: Creaspheres® are spherical texturizing powders. They are available in various sizes and in two materials, PMMA and Silica. Creaspheres® are used in emulsions and powder applications.
Creaspheres® PMMA beads are used in skin and colour care applications as texture enhancers and soft focus agents.
Typical use level: 3-5% in emulsions, 5-35% in powder applications.

Before using this material see the MSDS.
