

Pelavie® Peat

Chemical Composition:

Component	Legislation
Peat	-
*Phenoxyethanol	CAS No. 122-99-6 EINECS No. 204-589-7 JACT-9(2)1990, JCLS, JSCI, JSQI

* Preservative system can be modified by customer's request.

INCI Name: Peat (and) Phenoxyethanol

Technical Information:

Appearance	Gelatinous colloid
Odour :	Characteristic
pH (10% in water)	3,5 – 6,5
Loss on drying (1h at 105°C)	> 80%
Solubility	Dispersible in water
Shelf life	Minimum 3 years

Description: Pelavie® range consists of natural bioactive materials. Pelavie® Silts, Peat and Clays give many possibilities to create functional yet luxurious spa treatments. Pelavie® Silts are fresh water sediments whereas Pelavie® Peat comes from wetlands. Both are rich in humic acids and other bioactive compounds. Pelavie® Clays are bentonites, which have a capacity to adsorb toxins. Pelavie® Peat is suitable for face and body treatments.
Typical use level: 5 – 100%

Before using this material see the MSDS.
